

# The 2025 Global Counter-UAS Industry Directory and Buyer's Guide

**An essential reference guide for C-UAS system procurement agencies – and a key market/competitor analysis tool for the global industry**

**An Unmanned Airspace Publication**

For C-UAS technology suppliers, the Directory gives a unique view of competitor activity including new products, customer buying history and industry partnerships.

The new 2025 edition has been considerably expanded and allows readers to quickly and easily search for systems by type or country. It provides readers with the latest information on:

- Manufacturer-derived C-UAS system technical data and capabilities (with sources)
- Contract awards in the public domain
- Countries of origin and website contact details
- Partnership arrangements

The directory is broken down into the following industry sectors:

- Capture (net) systems
- C-UAS uncrewed ground vehicles
- Detector systems
- Directed energy
- Electronic counter measures (ECM)
- Guns
- Integrated systems
- Intercept drones
- Missiles
- Munitions
- Others, including software

The C-UAS industry is currently the most dynamic defence sector in the world, with new generations of technologies appearing every few months to counter emerging drone threats.

The 2025 Global Counter-UAS Industry Directory and Buyer's Guide is a one-stop shop directory which lists over 1,000 manufacturers with their products, contract awards, capabilities and deployments.

Since its first publication in 2017, the directory has become a vital source of market information for military, civil and security agency procurers around the world.

***“Every major C-UAS technology provider, system, capability, contract”***

= For C-UAS procurement officials the directory provides an easy-to-view essential reference guide which identifies the key players, technology capabilities and countries-of-origin - plus an essential reference to where the technology is in operation.

**The Unmanned Airspace 2025 Global Counter-UAS Systems Directory will be available in pdf, word and excel formats on September 25, 2025.**

**The Directory is available for £1,200.**

**For more information about the publication, including sample pages and ordering details, please contact the editor Philip Butterworth-Hayes at [philip@unmannedairspace.info](mailto:philip@unmannedairspace.info) or Telephone +44 7778 030 633.**
